Bicolor is the ideal solution for those architectural contexts where it is necessary to comply with condominium or urban planning guidelines, without wanting to sacrifice the style of one's home.

The Bicolor system, allows you to choose **two distinct colors**: one for the exterior side, in harmony with the surrounding environment, and one for the interior, reflecting the style of the decor.

The all-aluminum insulated profiles for both the exterior and interior sides are in High and Medium Density, made from environmentally friendly polyurethane foam, providing thermal and acoustic insulation, combining comfort and sustainability.

Bicolor has a smooth and silent winding, which does not jam.

One roller shutter, no compromise
